

This is how to access the YC network and Juniper a non-Yamhill County computer.

Please copy the attached icon to your desktop.

Remote Desktop

Save the Remote Desktop Connection icon to [your computer](#) desktop.

Double click on Remote Desktop Connection icon.

User name is: [yamhillcounty\your network logon \(example: ballb\)](#)

Password is: same as your network

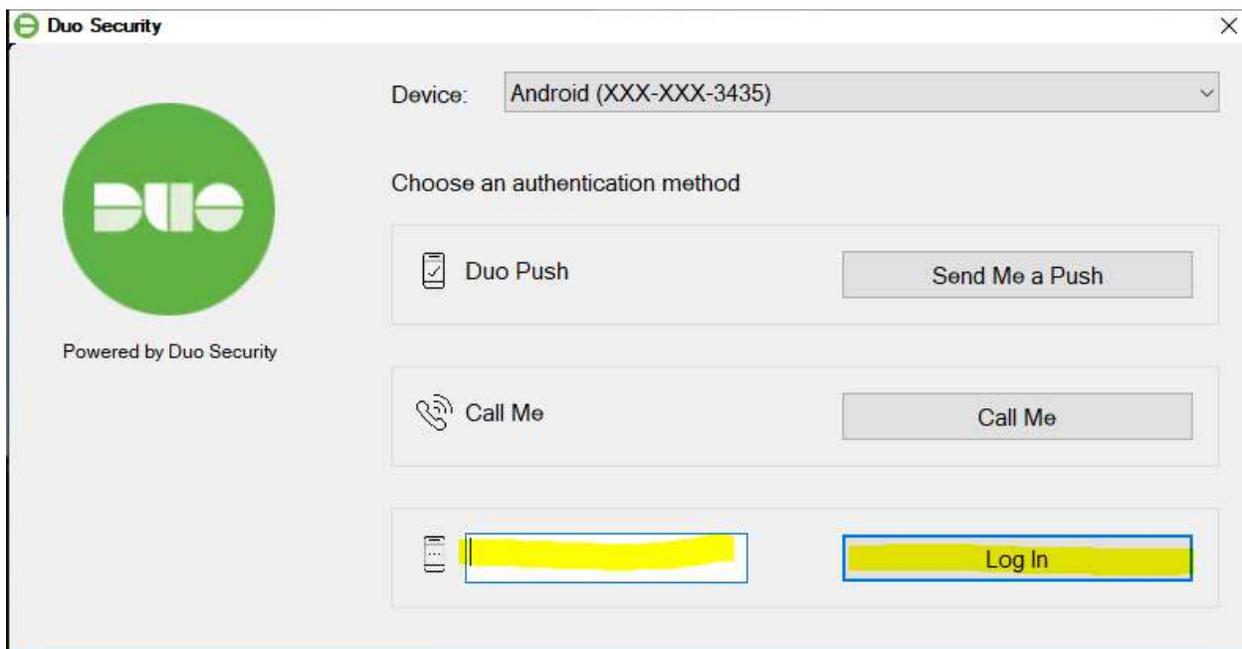

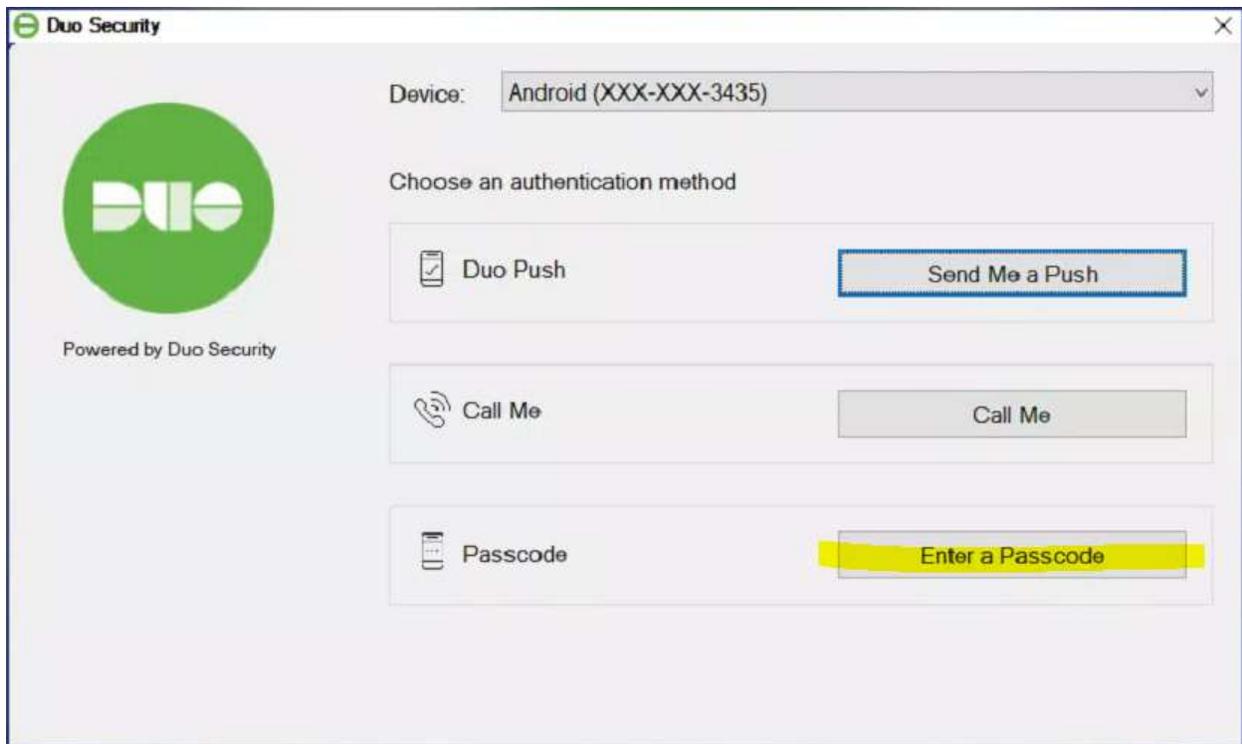

Sample screen:

Press OK and it will take you to a very similar screen where it will show your user name and domain.

Enter password once more.

After you enter your credentials, you'll see the screen below. First, click the Enter a Passcode button. Press the button on your fob to get a 6 digit passcode. Then type that passcode into the box and click Log In.

A blue screen will appear with an OK button. Click the OK button and your remote desktop session will be displayed. It's basically a computer within a computer – it can be resized, made full screen, or minimized – it's just like another program you'd run.

Remote Desktop Session Screen view

Close Remote Desktop Session by clicking on going to the start menu in the remote desktop and choosing "Sign Out".

If you need support for Remote desktop please contact the Help Desk 503-434-7555 x3282.
